

eRum

27 / 30 MAY 2020

MILAN

Data science
is writing
the future.
Come
and leave
a **mark on it.**

What is eRum

Data Science has revolutionized the way in which companies do business and scientists do research. Many of the simplest actions you take every day owe something to data science and R is one of the most adopted languages in this field.

The European R Users Meeting (eRum) is a biennial conference that brings the R User Community of Europe together to exchange experiences, broaden knowledge of R and collaborate. The third edition of eRum, **eRum2020**, will be held in 2020 in Milan.

eRum is an open event, and it welcomes expert and skillful practitioners as well as people who just want to take a peek on the future that's to come; its main purpose is providing a platform for collaboration and sharing experiences, while also being a stage to present various applications and projects development.

The numbers of eRum

eRum2020 will take place in Milan from May 27 to May 30. It will include one day of workshops and two days of conference, with:

Multiple parallel sessions on cutting-edge topics in Machine Learning, Statistics and Data Science

Plenary sessions with International keynote speakers

More than 70 contributions between long talks, lightning talks and workshops

More than 500 international R practitioners

With the support of our partners, we hope to offer our attendees:

Satellite events, like Hackathons and Recruiting Labs

A Social Dinner featuring famous Italian cuisine

Inclusion and diversity scholarships

Come and network with the top players in R World

Sponsorship of eRum2020 is a unique opportunity: it is the largest european assembly of R practitioners and rapidly growing.

Taking off from other great community meetings, such as the useR! conference, it brings together data science professionals from all over Europe, from both academia and industry and the different facets of the R world.

Being part of eRum2020 will give new roots to your network and tighten the bond between you and the R European community.

Sponsoring the eRum2020 is an ideal occasion to:

-  Gain high visibility and access to an audience of R professionals from all over Europe
-  Being part of the conference with a talk or workshop
-  Finding yourself in the ideal environment for recruiting new talents

Sponsorship packages

* The sponsor can organise an external event in the days around the conference (but not during the conference).
The event will be advertised in the website and the conference organisers will support the sponsor in the interaction with the attendees.

Welcome to Milano(R)

MilanoR is the organisation behind eRum2020 and the beating heart of the Milano based R community.

It organises monthly events and meetups, including data contests and hackathons, to educate, support and inspire R practitioners and enthusiasts in the Milan area and beyond. It is present on the territory since 2014 and counts about 4000 subscriptions!

Its network includes prestigious academic institutions (e.g. Milano Bicocca and Politecnico di Torino) and companies from different fields of applications.
